

Grading Net

Model: NAC-00800

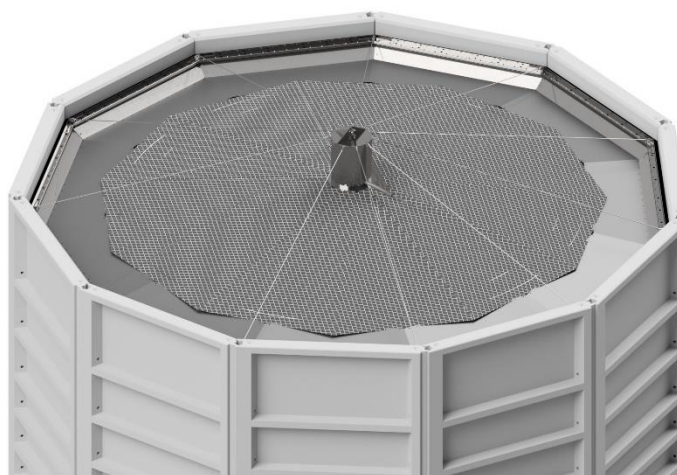

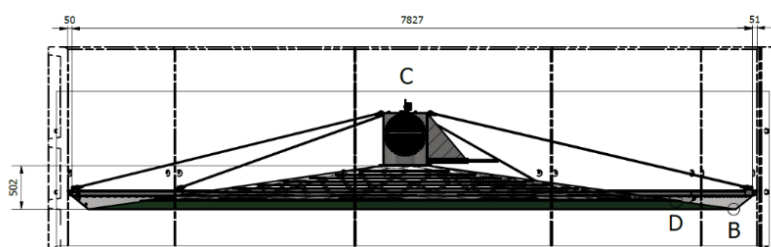

Area of use

Scalable Grading Net for Purge, designed for new or existing land-based aquaculture facilities. It can be used as splash/ jump net, and for gentle fish movement of crowded fish before harvest. The Net can be attached to a crane system rail, so it can be raised or lowered into the fishtanks. The construction consists of:

- **Top part** with wires attached to the steel profile around the inside of the tank
- **Threaded net** attached to the Top part and tarpaulin
- **Round bars** for net, when lowered into the tank, lays perfectly to the slope on the bottom.
- **Tarpaulin**, for tight and sealed connection between threaded net and steel structure.
- **Steel structure**, consist of rectangular profiles around the inside of the tank. With steel plate attached to the rectangular profile and tarpaulin together with threaded net.
- **EPDM**, for secure sealed solution, also to prevent the fish from ending above the net.

Materials

- Stainless steel (AISI316L)
- Wire (10 mm / AISI316L / MBL 56,kN)
- PE100 Black
- EPDM
- Tarpaulin (PVC coating / Acrylic top coating)
- Threaded net (2 mm / customized openings)
