

Swirl separator

Model: NAC-0005

Area of use

Swirl separator for small fish tanks. It can be customized for different types of tanks.

The swirl separator is installed next to the fish tank, and its installation height determines the water level in the fish tank. This device aims to remove large particles (feces and uneaten pellets) from the fish tanks through centrifuge and gravity forces.

- Simple to install to the tank
- Transport friendly
- Corrosion resistance

Materials

- PE100 – EN12201

Accessories

- Circulation piping
- Discharge valve
