

## Grading net

**Model:** NAC-00800

### Area of use

Scalable grading net for Purge, designed for new or existing land-based aquaculture facilities. It can be used as splash/jump net, and for gentle fish movement of crowded fish before harvest. The net can be attached to a crane system rail, so it can be raised or lowered into the fish tanks.

### The construction consists of:

- Top part with wires attached to the steel profile around the inside of the tank
- Threaded net attached to the top part and tarpaulin
- Round bars for the net, when lowered into the tank, lie perfectly to the bottom slope
- Tarpaulin for tight and sealed connection between threaded net and steel structure
- Steel structure consists of rectangular profiles around the inside of the tank with a steel plate attached to the profiles and tarpaulin together with a threaded net
- EPDM for a secure sealed solution, also to prevent the fish from ending above the net

### Materials

- Tarpaulin (PVC coating and acrylic top coating)
- Stainless steel – EN 1.4401
- Wire – EN 1.4401 – MBL 56 kN
- PE 100 – EN12201
- EPDM
