

40" CONTAINER – 2 X 65 M³/H RAS UNIT

Model: NAC-00910

Our RAS unit (recirculating aquaculture system) is now available in a fully integrated feed container, designed for seamless integration into new or existing land-based aquaculture facilities. This compact yet powerful system ensures optimal water quality and efficient resource management, boosting production while minimizing environmental impact.

SPECIFICATIONS

Materials

- PE100 – EN12201
- Stainless steel – EN 1.4401

Characteristics

- 2 x 65 m³/h capacity RAS systems
- 10 mg/L CO₂
- 3-30 °C
- UV at 85% T10 50 mj/cm²

Accessories

- Circulation pumps
- Drum filter
- Heating / cooling coils
- Bio media
- Vacuum blower
- Monitoring cabinet
- Sensors

Options

- Fixed bed filter
- Foam fractionator
