

SWIRL SEPARATOR

Model: NAC-0005

Swirl separator for small fish tanks.

It can be customized for different types of tanks.

The swirl separator is installed next to the fish tank, and its installation height determines the water level in the fish tank.

This device aims to remove large particles (feces and uneaten pellets) from the fish tank through centrifuge and gravity forces.

SPECIFICATIONS

Materials

- PE100 – EN12201

Characteristics

- 448 mm height
- 327 mm upper diameter
- Customizable

Accessories

- Circulation piping
- Discharge valve

Options

- Oxygen sensor
